

Holocron Era Reference List

This document defines the primary eras for both Star Wars continuities. These should be used to seed the Era table in the database.

1. Canon Eras

These align with the official Lucasfilm storytelling eras. Note the inclusion of "Visions" for stories explicitly detached from the primary timeline.

Era Name	Description / Key Milestones
Dawn of the Jedi	The origins of the Force and the first Jedi.
The Old Republic	The ancient era of the Republic and the Sith Wars (Canon context).
The High Republic	The golden age of the Jedi, centuries before Episode I.
Fall of the Jedi	The Prequel Trilogy era (Episodes I–III).
Reign of the Empire	The dark times between Revenge of the Sith and A New Hope.
Age of Rebellion	The Original Trilogy era (Episodes IV–VI).
The New Republic	The era following the Empire's defeat (The Mandalorian, Ahsoka).
Rise of the First Order	The Sequel Trilogy era (Episodes VII–IX).
New Jedi Order	The future era featuring Rey’s reconstruction of the Order.
Visions (Non-Continuity)	Stories created to be bold and not bound by the primary Canon timeline.

2. Legends Eras

These align with the classic Expanded Universe (EU) chronology. Note the inclusion of "Infinities" for parodies and "What If" scenarios.

Era Name	Timeline Range (Approx)
Before the Republic	Up to 25,000 BBY (Dawn of the Jedi era).

The Old Republic	25,000 BBY – 1,000 BBY (Tales of the Jedi, KOTOR).
Rise of the Empire	1,000 BBY – 0 BBY (Prequels and the Purge).
The Rebellion Era	0 BBY – 5 ABY (The Original Trilogy EU).
The New Republic	5 ABY – 25 ABY (Thrawn Trilogy, Jedi Academy).
The New Jedi Order	25 ABY – 40 ABY (The Yuuzhan Vong War).
Legacy Era	40 ABY – 140+ ABY (Fate of the Jedi, Legacy comics).
Infinites (Non-Continuity)	Non-canon stories, parodies, or "What If" scenarios (e.g., <i>Star Wars Infinites</i>).

3. Implementation Notes for Claude Code

- **Sorting:** Use a `sort_order` (Integer) field to ensure the dropdown follows the chronological lists above.
 - Chronological eras should be `10`, `20`, `30`...
 - Non-continuity eras (Visions/Infinites) should be assigned `999`.
- **The "Timeline Spanning" Feature (Ideas - TBD):**
 - **UI Requirement:** A checkbox next to the Era dropdown labeled **"Multiple Eras / Timeline Spanning."**
 - **Option 1 (Simple):** Checking this box enables a secondary multi-select list. Note: This requires a many-to-many relationship in the database between `Work` and `Era`.
 - **Option 2 (Archival Primary):** The user selects a **Primary Era** (the dominant timeframe). Checking the box simply adds a "Timeline Spanning" flag to the record, which displays a unique icon badge in the UI.
- **Non-Narrative Reference Material (TBD):**
 - For guides, blueprints, and tech manuals, the Era field should not be present.
 - These items are categorized by Continuity (Canon/Legends) but bypass Era-based narrative filters.
